SUMMARY

Tech Lead and Solution Architect with 9+ years building full-stack platforms, MES systems and self-hosted AI. Hands-on across Angular, Java/Spring Boot, .NET and Node.js — and extensive practical use of open-source AI: Ollama, GitHub Copilot, n8n, Llama 3, Mistral, Qwen and DeepSeek. Lead engineering teams shipping enterprise software for manufacturing, aerospace and CPG.

TECHNICAL SKILLS

Frontend: Angular 12/14/16, React, Next.js, TypeScript, PrimeNG, Material UI, DevExpress, Kendo UI

Backend: Java 17+, Spring Boot 3, Spring 6 / JPA, Node.js, .NET / ASP.NET, REST, GraphQL, JUnit 5

Data: MySQL, SQL Server, CouchDB, SSRS, Proficy Historian, Kafka, RabbitMQ

Cloud & DevOps: Docker, Jenkins CI/CD, Portainer, AWS, Azure, Git, Mercurial

Security: OAuth 2.0, JWT, Keycloak, Active Directory, SSO / UAA / IAM

AI / LLM: Ollama, GitHub Copilot, n8n, Llama 3, Mistral, Qwen, DeepSeek, RAG pipelines, LangChain, pgvector, Local Model Ops

EXPERIENCE

Services Engineer / Tech Lead — GE Digital

Mar 2020 — Present

- Own core MES modules across GE Proficy Historian and Operations Hub for Ardex, TEI, Sofia Med, Lotus, P&G, Kellogg's and Qatar Cool.
- Lead UI architecture across Angular 12 → 16 migrations with zero customer downtime.
- Architect and operate self-hosted LLM tooling on Ollama (Llama 3, Mistral, Qwen, DeepSeek) for internal engineering use.
- Build n8n workflows and Copilot-driven agents to accelerate delivery and automation.
- Mentor 7+ engineers, run code reviews, release planning and on-call rotation.

Full-Stack Developer — Capgemini India

Jun 2018 — Jun 2020

- Delivered GE Aviation MES for spare-parts and engine manufacturing — work queues, OEE tracking, multi-user logins and alerting.
- Built Spring Boot services + Angular 8 UIs with Jenkins/Docker pipelines for plant deployments.

Frontend Developer — Avast Technologies

Jan 2016 — Jun 2018

- Built UIs across multiple startup-stage products using modern JS frameworks and reusable component libraries.
- Contributed to Java/Spring Boot services for product back-ends.

SELECTED PROJECTS

Ollama Model Ops — Self-hosted LLM gateway managing Llama 3, Mistral, Qwen and DeepSeek with model routing, GPU scheduling and observability.

Ardex — Plant Operations MES — Operations Hub rollout with batch genealogy, downtime capture and shift dashboards.

TEI — Engine Overhaul MES — Aerospace overhaul workflows with serialized parts, NDT capture and certification packs.

Sofia Med — Copper Plant MES — Coil-level genealogy, furnace KPIs and quality holds across hot/cold rolling lines.

Lotus — Manufacturing MES — SAP-aligned line scheduling, changeover wizard and OEE benchmarking.

RAG Knowledge Assistant — Air-gapped retrieval-augmented assistant on Ollama + pgvector + n8n with full source citations.

Aviation Engine MES — GE Aviation spare-parts MES with work queues, OEE, and real-time alerting.
